

Practice Estimating!

Skills you'll practice:

- Estimating
- Memory

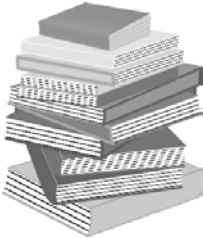

Directions:

Begin by having your child estimate (guess) the total number of objects listed below and write their answer in the space provided.

Emphasize that this is only a guess and it doesn't need to be perfect. *You may need to modify / clarify which objects should be included for your specific household.*

When finished, send your child on a scavenger hunt to find the true total counts of the items listed.

Discuss why some estimates were more accurate than others.

Object	Estimated Count	Real Count	Object	Estimated Count	Real Count
 Crayons in a crayon box	_____	_____	 Trees in the yard	_____	_____
 Keys on a key ring	_____	_____	 Pictures on the walls	_____	_____
 Coins in a piggy bank	_____	_____	 Books in your room	_____	_____
